About This Game

Beast Battle Simulator is a physics based battle-simulation sandbox game featuring dinosaurs, animals, and humans. Kamikaze Zebras VS. T-Rex with laser guns, Lions with machine guns VS. a flock of 50 seagulls; anything is possible! Watch as the beasts dismember and rip each other apart in gory detail!

BBS is fully physics simulated, so the beasts can smash and knock each other over in emergent ways. They can even lose limbs depending on where they're hit or bitten. Every beast in the game has a unique fighting style and attack pattern.

Beast Soccer

BBS includes a Soccer gamemode in which you can pit beasts against each other for a violent game of soccer. Who plays better football: Brachiosaurus or Polar Bears? Set up the match and find out for yourself!

Weapon Attachments

Customize your beasts by attaching weapons to them like machine guns, flame throwers, and bomb vests.

Challenge Mode

In challenge mode, you must construct a team of beasts to complete a given task for each level. The game features 60 challenges. From smashing down pyramids of crates, to beating big dinosaurs in GIANT beast soccer, to having to face the dreaded penguin king, each challenge offers a unique gameplay experience.

Sandbox Mode

In sandbox mode, the only limit is your imagination. You set up both teams for a custom battle of whatever units you want. You can even edit the health and damage values of your beasts to create unique custom units like a super-powered puppy, or a killer pig.

Beast Control

At any time during battle you can use left click to take control of a beast and join the battle!

Features

- 50+ different units to use in battle
- Equippable weapons (Flamethrowers, Lasers, Miniguns, etc)
- Physics-based simulation
- Sandbox mode
- Challenge mode (60 Challenges)
- BEAST SOCCER gamemode
- Custom units: Modify the health and damage of your beasts
- Extreme dismemberment and gore
- Onslaught mode: defend your tower from waves of enemies by spawning beasts in real-time and casting spells
- Beast Control: at any time during battle you can take control and play as one of the beasts

Title: Beast Battle Simulator
Genre: Action, Indie, Simulation, Sports, Strategy

English

This is a great game, but i wish there were more updates.

Some things i would like to see

1. Unicorn
2. Robots
3. more human types

but besides that, this game is kinda like a dollar store TABS, but its still fun

i think my only need for the game is more updates. Might as well play it while waiting for TABS to get a full release.. good for seeing if 1 t-rax vs 100 pigs (good game)

. It's good but I wish there was more challenges and the cannon soccer challenge is stupid.. This game is awesome - I have finally found a football game I love. Great fun with kids or with friends. You might need a beefy pc for it to run on top settings. here's my first game of football <https://youtu.be/nYKzFw5B5dc>

i like this game - tonight we will be seeing how many Gorillas does it take to kill a T-Rex

OK so even though i have a reasonably beefy pc i have found that if you want more beasts on the field keep the settings a little lower than normal - other than a few odd glitches in graphics so far the game is awesome - Just a note to the devs - The camera should not go through the ground - kinda freaks me out when it happens - also it would be good when you apply on weapon to an animal you can have options to apply to them all -

had great fun today I made a team of the penguins of madagascar armed with ALL weapons see how many waves they could survive of increasing difficulty

also had good fun with it cos the kids love playing it too so we had fun playing it with the younger kids and adding animals in pairs or threes and 5's etc and had fun doing math as well as killing some animals and dinosaurs - awesome

<https://www.youtube.com/watch?v=QEolb5d2ITo>. The Football matches are a hoot, easily the best part of this game :). The game is pretty damn fun (especially for the price tag). It runs fine so far on my PC but I do have a beast PC so no guarantees. I definitely recommend it and hope that the devs continue adding new beasts and modes (and extra camera controls too) and supporting this game.. African animals and dinosaurs play soccer with machine guns.

"My Childhood - The Game". was great devs stopped updating now garbage yay

Trex VS Giraffe, Penguins VS Brachiosaurus, Raptors VS Dingoes and all of this in a soccer field with a giant soccer ball... How do you not already have this game! Come join me in one heck of a soccer match that can only be described as Rocket League meets Jurassic Park.

<https://www.youtube.com/watch?v=MzilFcjjcGc>. Developers abandoned game after making a few dollars, and gets old pretty fast. Good but the devs havent updated the game in 2 years and they call it a complete game.

Pros

- Fun,wacky and gory
- you can control units
- you can play soccer (lol)
- you get to use tons of fun creatures such as yeti,t-rex,mages,swordsman,tanks and jeeps
- you can make walls with crates and explode people with barrels
- Best part is using weapons like miniguns and attaching them to creatures

Cons

- Only 10-30 hours of fun in this game
- not worth the price
- game gives you really bad flashes because of how glitchy everything is
- better options (tabs and heck even uebs is better than this)
- not enough unit varity
- devs don't update

Sure its fun but the campaign can be completed in 2 hours and it get boring because most of the units are similiar.. it realeses updates very fast and it has some lags if you're playing on a weak computer but if you like a creative or sandbox games you should try this game. Just about the best stupid thing you can make a computer do. It can't stop you! You just tell your computer to make it run this dumb nonsense and it has to. In the words of this incredible, very stupid game: "When in Rome? Laser Dome.". I Have some ideas that you can make for the game like a mech. A cool little mech for a update will be very cool. I have watched a film called avatar and theres a small cool looking mech in there. If you search "Avatar mech" it will show you it. Also i have finished all 30 levels. I don't want to be too greedy but there should be some bosses. Also to make it really addictive especially for me and my friends, please add multiplayer to the game. You can make it how ever you like it to be.

Thanks for your time to read this.

I love this game.

Edit - Ive been thinking that the mech wont fit in the game and im asking them to just throw it in but it actually fits it because they added a tank. That is in device. Also the mech can go in device.
